BENELLI LAW ENFORCEMENT

“There’s no second-place winner in a gun fight,” is an old saying, but for those shouldering law enforcement responsibilities, this is more than just a saying—it’s a way of life. Firearms reliability is paramount when you walk the mean streets and Benelli understands how crucial it is when your life depends on the gun you hold in your hands. When it comes to shotguns, Benelli delivers the reliability on which, you can depend. Whether it’s the Nova’s pump-action, the M2’s Inertia Driven® system or the M4’s A.R.G.O system, Benelli has the shotgun that will meet your needs and satisfy your demands—Benelli has even developed the M3’s convertible system that offers the option of switching between pump-action and semi-auto operation depending on the job at hand.

PLEASE NOTE: THIS IS A LAW ENFORCEMENT CATALOG. SALES OF PRODUCT DISPLAYED IN THIS CATALOG ARE RESTRICTED TO LAW ENFORCEMENT ONLY.

Our 10-Year Warranty, which leads the industry, guarantees that if anything should go wrong, under normal use, your firearm will be serviced by skilled gunsmiths at our national firearm service center. While your Benelli is under warranty, we will assume the cost of parts, labor and shipping required to get your firearm back to you and working perfectly.

A.R.G.O. GAS SYSTEM SHORT STROKE, DUAL PISTON-DRIVEN SYSTEM.

In 1998, Benelli delivered five M4s to the Aberdeen Proving Ground in Maryland. These guns endured grueling tests for safety, function and performance, and exceeded stringent operational requirements. The M4 proved to be totally reliable in every test situation and was chosen as the new U.S. Joint Service Combat shotgun. Benelli's M4 Tactical is a unique Auto Regulating Gas Operated (A.R.G.O.) semi-auto shotgun, upon which the U.S. Marine Corps still depend today.

M4 A.R.G.O. SYSTEM

The pistons are required to move only 1/2" for complete cycling which results in a faster operation with minimum vibration and quick target acquisition.

INERTIA DRIVEN SYSTEM ULTRA-RELIABLE, FAST AND SIMPLE.

The Inertia Driven® System was originally developed for Benelli semi-auto shotguns more than 40 years ago. Without ever needing adjusting, this system utilizes the energy from recoil to cycle anything from light field loads to heavy magnums with consistent reliability, year after year. There are Benelli shotguns that have fired over 500,000 rounds that are still functioning perfectly today. The Inertia Driven® System is simple with only three primary parts: the

bolt body, the inertia spring and the rotating bolt head. Because gas, smoke and burnt powder residue are expelled out of the barrel, rather than being channeled into the gun's mechanism, Benelli guns shoot cleaner than any other shotgun. This allows them to be much easier to maintain, increasing reliability. With no springs, action bar linkage, or heavy gas cylinder under the forend, Benelli semi-autos balance perfectly.

M4
WHEN RELIABILITY COUNTS.

When everything is on the line, only the best will do. The M4, originally developed as the U.S. Joint Service Combat shotgun in 1998, is a gas-operated semi-automatic 12-gauge shotgun that features Benelli's patented self-cleaning, auto-regulating gas operating system (A.R.G.O.). The M4 metalwork is chrome-plated, anodized or coated with heavy phosphate to prevent rust and corrosion under the most grueling

conditions. The fore-end and pistol grip are constructed of a tough synthetic polymer material for an absolute positive grip in wet or dry conditions. The telescoping aluminum buttstock can be retracted for convenient portability or storage. The extended magazine will hold seven 2 3/4-inch shells or six 3-inch magnum shells. Assembly and disassembly is quick and easy and can be accomplished without tools.

M4 TACTICAL, PISTOL GRIP – 12-GA, 3"

Item # 11721 Telescoping stock, Ghost-ring sights
Shown with Sure Fire forend and Laser Devices flashlight , not included

M4 TACTICAL – 12-GA, 3"

Item # 11710 Tactical stock, Ghost-ring sights

M4 H₂O – 12-GA, 3"

Item # 11711 Telescoping stock, Ghost-ring sights with Tritium inserts

M4 ENTRY – 12-GA, 3"

Item # 11723 Tactical stock, Ghost-ring sights

M4 TACTICAL, PISTOL GRIP – 12-GA, 3"

Item # 11721 Telescoping stock, Ghost-ring sights
Shown with Sure Fire rail forend, Burris Speed Dot optic
and Laser Devices MK4 flashlight, not included

A Picatinny rail allows the mounting of scopes, red dot sights or night vision optics.

◇ All NFA rules apply.

The M4 H₂O utilizes the ultra weather-proof NP3 finish on the trigger group, barrel, bolt body, receiver, magazine tube, and other critical inner metal parts.

VINCI TACTICAL SIMPLY EFFICIENT.

The Vinci, introduced in 2009, revolutionized shotgun design and established Practical Speed Performance (PSP), a major benefit for carrying out reliable law enforcement duties. “Shoulder the gun, acquire the target, shoot, recover and shoot again,” is the essence of how rapidly a gun can fire accurately and dependably—this is PSP and there’s no faster performing shotgun than the Vinci. At the heart of the Vinci is the In-Line Inertia Driven® system that is completely contained within the receiver enabling it to cycle shells faster than

ever. But to take advantage of this speed, it was necessary to reduce recoil and minimize muzzle climb, which was accomplished when Benelli developed the ComforTech® Plus recoil reduction system. Without adding weight, ComforTech® Plus also allows the Vinci to retain superior balance when shouldering and firing the gun. The Vinci consists of three modules—the barrel/receiver module, the trigger group/forend module and Quadrafit™ Buttstock module—and its modular design makes it the easiest shotgun in the world to assemble and disassemble.

COMMON SPECIFICATIONS: Crio® Chokes: IC,M,F Length of Pull: 14¾" Drop at Heel: 2½" Drop at Comb: 1½" Minimum recommended load: 3-dram, 1⅛ oz. loads. †Receiver drilled and tapped for scope mount. Picatinny rail included.

SPECIFICATIONS AND PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

The Vinci Tactical features a factory-fitted Picatinny rail that is on top of the receiver, which allows easy and fast mounting of optics.

The Vinci is fast and easy to load and unload with the oversized, Dual-Purpose Release Lever, even with gloves. To load, place a round in the ejection port and merely depress the Dual-Purpose Release Lever to chamber a shell.

The Vinci is comprised of three main components — the Barrel/Receiver module, the Trigger Group/Forearm module, and the Quadrafit™ Buttstock module — making it the easiest shotgun in the world to assemble and disassemble easily without tools or special equipment.

M3 CONVERTIBLE TOTAL VERSATILITY.

The M3 is a unique semi-automatic 12-gauge shotgun that is reliable and versatile for any operational or defensive requirement. The M3 allows officers the option of choosing either semi-auto or pump-action operation, depending on the intended purpose. It's easy to select fast-cycling semi-auto fire with conventional loads or you can chose pump-action for low-energy special purpose loads. Switching between semi-auto and pump-action is simple—merely rotate the selector ring at the front of the forend ¼-turn then push forward to change from pump-action to semi-auto or pull back to switch from semi-auto to pump-action and then release the selector. The M3 comes with ghost ring sights and night sights are available. The stock is constructed of a tough synthetic polymer, and is available with a collapsible telescoping buttstock that can be adjusted in five positions, while maintaining full function.

M2 STOPS DANGER IN ITS TRACKS.

When the job demands the highest standards of reliable operation for guns performing under the pressures and stresses of action, Benelli's M2 Tactical has passed the test of time; establishing itself as the shotgun of choice for serious tactical

needs. The M2 Tactical is Inertia Driven®, utilizing recoil energy to cycle the action and eliminate fouling problems. The M2 Tactical runs clean by blowing all of the gas and residue—created by shot shell discharge—out of the barrel.

**SUPERNOVA TACTICAL
ROCK-SOLID PUMP ACTION.**

The SuperNova, conceived and designed in 2005, embodies a modular construction with a lightweight steel skeletal framework over-molded with a high-tech polymer, making this pump-action shotgun super-light, super-strong and impervious to all weather conditions. The SuperNova will reliably fire and cycle a variety of shotshells, including everything from target loads to 3½"-Magnums. The SuperNova is available with a choice of three modular buttstocks and can be quickly reconfigured. The buttstock options include the Pistol Grip,

ComforTech®, and a telescoping stock, which makes transport in any type of vehicle easy. An easily accessible mag-stop button on the forend makes it possible to extract a cartridge from the SuperNova's chamber while leaving the other cartridges in place in the magazine. This handy feature enables you to quickly remove a shotshell from the chamber and re-chamber a different shotshell, all without having to unload the magazine. Benelli's Nova and SuperNova are the only pump-action shotguns available on the market with this exclusive patented feature.

Receiver drilled and tapped for scope mounting.

NOVA PUMP TACTICAL – 12-GA, 3½"
Item # 20056 Tactical stock, Ghost-ring sights

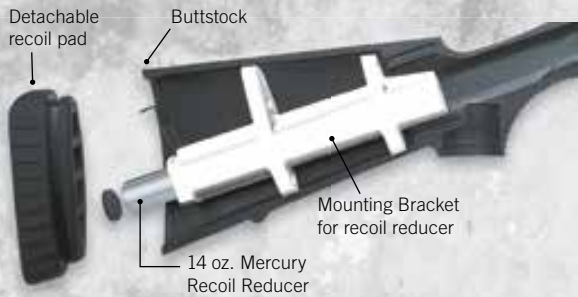

NOVA TACTICAL MULTIPURPOSE AND INDESTRUCTIBLE.

Officers requiring pump-action reliability reach for Benelli’s Nova, a sturdy, no nonsense 12-ga. shotgun that provides complete confidence in its smooth and flawless operation. The Nova represents an important breakthrough in the field of pump-action shotguns, thanks to Benelli’s technological experience and precision engineering. The one-piece stock and receiver is injection-molded and made from a high-strength synthetic polymer material that’s been reinforced

with fiberglass. This makes the Nova completely impervious to humidity, abrasion, shock and this rugged gun can even withstand the effects of solvents and chemical products. Comprised of a minimum number of parts, the Nova’s manual operation allows the forend to slide freely along the barrel for fluid movement and rapid-fire speed. The Nova will reliably fire and cycle a variety of shotshells, including everything from target loads to 3½"-Magnums.

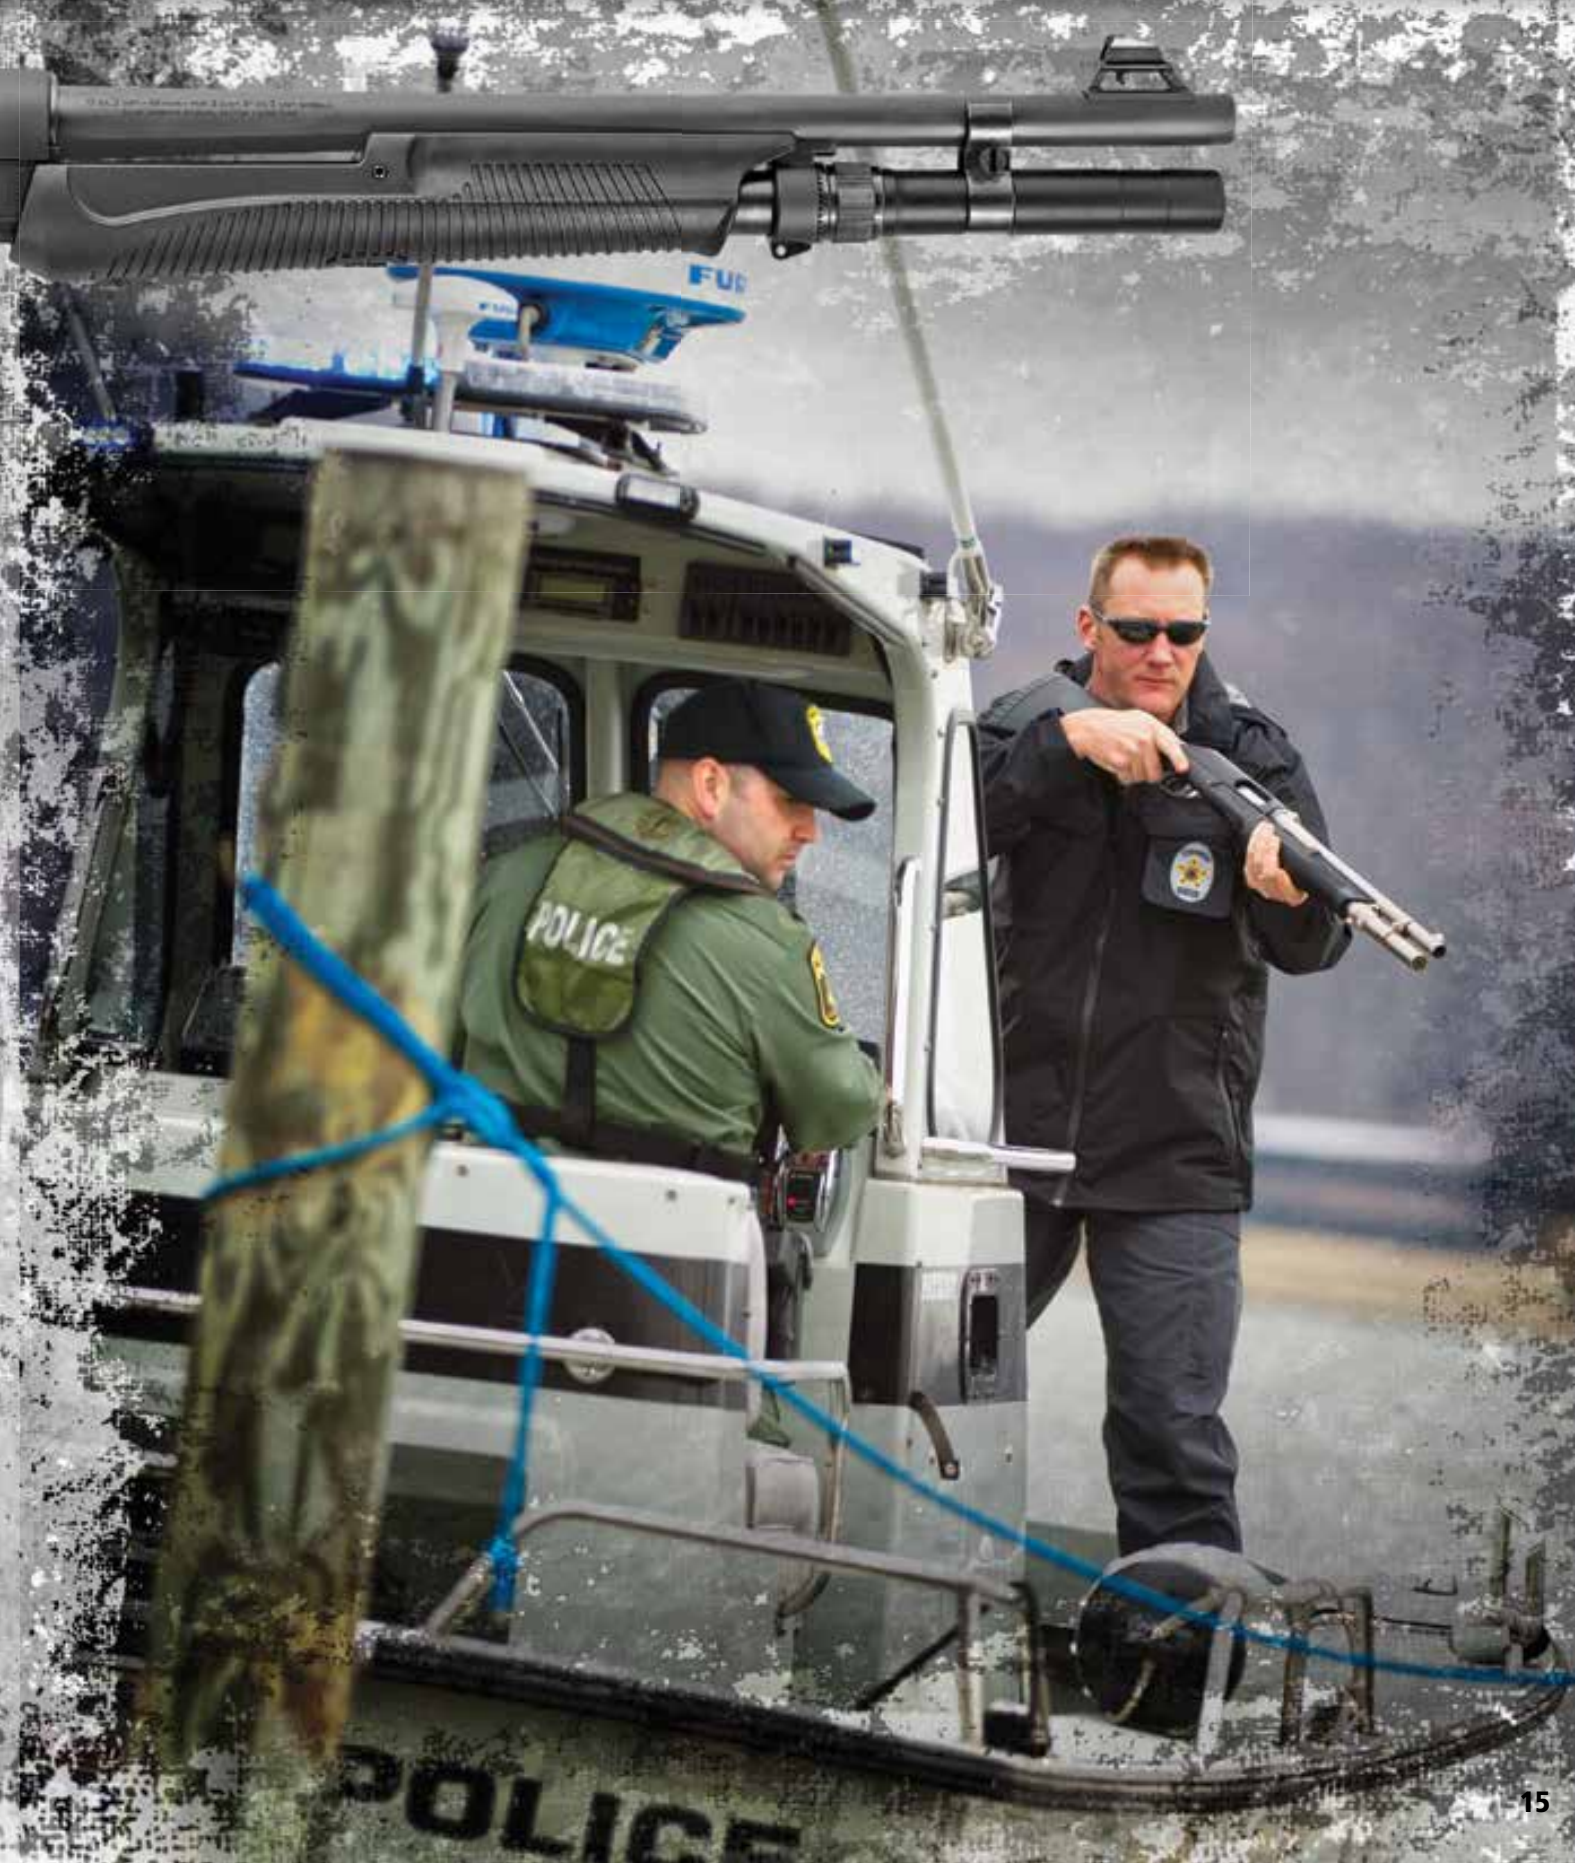

NOVA PUMP TACTICAL H₂O – 12-GA, 3½"
Item # 20091 Tactical stock, Open rifle sights
